WHIRLING

feels so natural ...

The HOESCH whirlpool systems can be easily integrated into almost every HOESCH bathtub, turning the bathroom into a private wellness area.

Delicate sensation

Enjoy that feeling of butterflies in your tummy!

Key facts and tips about whirling

In what way is whirl bathing good for our health?

Whirling is healthy, especially if you enjoy it regularly:

- It cleanses your skin.
 - It relaxes your muscles.
 - It massages your connective tissues.
 - It improves circulation.
 - It stimulates your metabolism.
 - It boosts the immune system.
 - It relieves the symptoms of colds.
 - It warms the body more quickly and more gently than a normal bath, as the flow of water improves the way the heat acts on the body.
 - It relieves back pain and tension.
 - It calms the nerves and relaxes mind and body. Regular whirl bathing makes our everyday lives less stressful.
 - It helps our bodies regenerate themselves: minor injuries and muscular cramps heal more quickly and more efficiently.
 - Special jets allow the flow of water to be used for foot reflex zone massages.
- As in a normal bathtub: take care if you bleed easily or suffer from heart or circulatory problems.

How does the whirl system work?

The sensuous pleasure of whirl bathing is actually derived from a really simple idea: jets in the back and sides of the whirltub pump the water into the tub. The strength of the air-water mix can be controlled precisely to allow it to be directed exactly to where it is needed. Air jets in the base of the tub release bubbles of air up through the water. The combination of these two types of jet provide you with the perfect whirling experience.

What temperature should the water in the whirl system be? How long should one stay in the tub?

The ideal water temperature is between 36 and 38 degrees. See which temperature suits you best. Stay in the whirltub or whirlpool for around 15 to 20 minutes. But remember that whirl bathing is not something to be done in passing. Enjoy the time to yourself and leave yourself a little more time to relax after your session: read a book, snuggle up in something warm or go for a gentle stroll. Only you know what is best for you and your body.

WHIRLTUBS

HOESCH

Live your wellness dream: your own whirltub. Relax in warm, bubbling water at home whenever you like – stress-free. Simply superb! How brilliant that almost any model of bathtub from HOESCH can be fitted with an innovative whirl system.

HOESCH

Innovation whirl technology

WHIRLTUBS

The whirlpool jets in the back and side walls of the whirlpool bath are used for massage and thus for targeted relaxation of muscles in certain parts of the body. The air jets are recessed in the bottom of the tub and cover the entire surface. The rising air vitalizes the entire body and stimulates circulation. The best feel-good effect is achieved by combining both types of jets.

Innovative technology does not stop when you reach for your towel. We guarantee unbeatable hygiene through drainage of the residual water. A fully automatic, semiautomatic or manual disinfection system is fitted as standard. Whirl bathing with HOESCH: simply carefree.

Whirlbathing is the most tingling way to create yourself again and again. Through the combination of moist warmth and gentle massage, everyday stresses roll off you. Pain and tension are reduced and the circulation is regulated. Especially for the back, shoulders and neck there is hardly anything more beneficial. Your blood circulation is stimulated - the skin appears fresher and firmer. Your muscles are relaxed and strengthened and your soul revives. You will feel younger, more relaxed. As if reborn.

HOESCH

DELUXE: HighEnd

What the classical bathtub already provides for physical and mental relaxation, a high class whirltub surpasses by far.

The pleasant warmth of the water harmonises perfectly with the two LED underwater spotlights, that turn the whirltub and the entire bathroom into a sea of color. Due to the whirl system the individual droplets dance on the water surface, it is a Deluxe whirling pleasure – made by HOESCH.

Use all possibilities of the whirl programmes

A harmonic atmosphere can be created even before the intrinsic whirl pleasure begins. LED underwater spotlights and automatic colour changers are extras, that perfectly complement any whirl programme. At the same time the innovative jet technology offers full whirlpower: Hoesch gives you the choice between massage jets (up to 8) in the sides of the bath, air jets (up to 27) in the bottom and a combination of both. The surface of the in-built components is chrome plated or made of stainless steel. The water/air flow, whose force and direction can be regulated manually, as well as the adjustable air-injection system, that produces gentle air bubbles, will fulfill your personal expectations. Besides, the Deluxe-system represents the highest level of hygiene: while the jets are closed, the whole pipe system is pre-rinsed with a mix of disinfectant and fresh water. Get into a perfectly clean bathtub, select the automatic programs to your needs and let us pamper you with the outstanding HOESCH massage. Intensify your prickling wellness experience.

Benefit from the latest whirl technology

The innovative Deluxe system by Hoesch is pure luxury within our whirl programmes. In order to be convinced of the wonderful effects of whirling, try the four tailor-made and fully automatic whirl systems yourself. The "Fitness" programme is ideal for gently and pleasantly loosening tense muscles. The body is massaged softly and beneficially with the "Relax" programme, which soothes the vegetative nervous system. On the contrary, the "Energy" programme stimulates, refreshes and re-energises. Along a principle that is similar to that of the steam sauna works the "Vitality" programme. It heats and then cools the body. The choice is yours.

FITNESS – massages and improves blood circulation

The FITNESS programme (approx. 18 minutes) is especially designed to soothe and relax tense muscles. Its intense massaging effects on the body improving blood circulation and stimulating the cardiovascular system.

RELAX – gentle and soothing

Above all, the RELAX programme soothes the autonomic nervous system. The body is gently and pleasantly massaged during an approximately 30 minute whirl time. The massage intensity slowly decreases while intervals increasingly become shorter.

VITALITY – warm and powerful

The VITALITY programme operates like a steam sauna: The body is pleasantly warmed and then cooled. The temperature is automatically increased during an approximate 26 minute whirl time. The body is purified and the immune system is strengthened. Important: After the soaking in the whirlpool, rinse your legs with cold water and then relax for 15 minutes.

ENERGY – stimulating and refreshing

The ENERGY programme (approx. 15 minutes) stimulates and activates the entire autonomic nervous system. As time intervals noticeably increase so does the intensity of the massage. The body is refreshed and energy is restored.

HOESCH

DELUXE: HighEnd

An innovative whirl system
with exceptionally attractive features

Try it for yourself:

- Optimum water massage from up to 8 chrome whirl jets (variable positioning), massage jet can be adjusted 15° by hand
- Plane surface technology for flexible positioning of Venturi jets
- 12–27 air jets in the base supplied with warm air (entry temperature 40°C)

HOESCH

Safety and hygiene of your HOESCH whirlpool bath

Dry-run protection

Your HOESCH whirltub is equipped with dry-run protection. The pump, the lighting or the disinfection function can be started only when the green LED diode is on. The dry-run protection constitutes a protection against starting the system when the bathtub is empty or the water level is too low.

Automatic switching-off of the system

The operational time of the system is limited to 25 minutes. After 25 minutes, regardless of the buttons switched on, the system switches-off automatically.

Disinfection

Regular disinfection of your whirltub guarantees optimal hygiene. When the tub is not used for longer period of time, it is necessary to make disinfection before running the tub! In order to run disinfection, there must be certain level of water- alternatively, the water level must be raised to the required level at which it is also possible to activate underwater spotlight.

HOESCH

Foam baths

- Sandalwood - soothing, calming, regenerating, satisfying
- Clove Honey - concentration-enhancing, vitality-enhancing, strength-enhancing
- Musk - warming, stimulating, releasing
- Cajeput - energy-promoting, refreshing
- Cajeput mandarin - exhilarating, relaxing, stimulating, invigorating
- Lavender - mood-lifting, relaxing
- Lemongrass lemon balm - invigorating, refreshing, promotes concentration
- Vanilla - calming, relaxing

Foam baths for whirlpools from HOESCH are only slightly foaming and support the deep effect of the bubbling bath.
