## FROM CHAOS TO ORDER.

Geometry played an essential part in the evolution of the language of form. 2,500 years ago, humankind developed the science of geometry – and created the ability to structure space methodically, giving it a new and meaningful order. Perception of our natural environment grew abstract as human thought advanced to a new stage of cognition. Out of reflection about elementary geometric shapes like circle, triangle,

square, sphere and cylinder, the systematic, creative occupation with the spatial order of the universe was born. The discovery of geometry was a high point in the process of civilization; with this science, humankind stepped beyond its natural state once and for all. Since then, geometry has become the basis for art, architecture and design – the key to the development of innovative, extraordinary ideas about form.

## THE FASCINATION OF CLARITY.

**GEOMETRY** is a tribute to human reason. Here, the intellect joins forces with an intuitive understanding of form. A concept that intrigues people who find that perfection and emotion can go hand in hand. Inspiration through intelligence.

The basin is the functional center of the bathroom.

With **GEOMETRY** fittings, it also becomes an optical highlight.

## ACCESSORIES

A room's atmosphere arises from the interaction of all elements. **GEOMETRY** accessories take up the clear lines of the fittings and create a harmonious living experience.

CHRISTIAN BJØRN DESIGN

AD VAN BERLO

Two of the most prestigious Scandinavian designers of our time stand behind **GEOMETRY**. Christian Bjørn Design has created products for well-known companies for 25 years, winning numerous international design awards. VANBERLOSTUDIO has enjoyed international renown since 1982. With the **GEOMETRY** product line, these creative minds have once again shown their class.

# PRODUCTLIST GEOMETRY

## Special features of the GEOMETRY Line

Due to the minimalist design there are some technical peculiarities that need to be considered during **planning and installation**.

All build-in fittings (concealed single lever mixers, concealed thermostats, concealed multi-way valves, wall elbows etc.) have **unique build-in parts**, especially designed for the GEOMETRY line.

These products show the remark **“complete with trim and concealed parts”** or **“with special concealed parts”** for the wall elbow.

The packaging of these products contains the rough (part to be build in the wall) and the trim (visible parts like face plate and handles) in a common box with a common article number.

The same is applicable for the wall elbow (F1631AA) and the personal hand shower assembly (F1358AA).

GEOMETRY A6 fittings are suitable for wall thickness up to 73 mm.

Due to these reasons it is mandatory to have **all fittings available that are contain build-in parts (also wall elbows) prior to the installation**.
